14<sup>th</sup> February 2012

2004 'Australian Marina of the Year'  
2004 'Recreational/Tourism Marina Operations'  
2004 'Marina Club of the Year'

To Whom It May Concern,

The City of Mandurah (CoM) is responsible for the provision and on-going maintenance of an array of Waterways based infrastructure throughout the Peel Region.

Mandurah Jetty Constructions have been engaged by the CoM on many occasions to repair and upgrade these facilities. These jobs have included tasks such as;

- Jetty chaffer installation and replacement
- Jetty and boardwalk timber decking and railing replacement
- Jetty and boardwalk sub-structure inspection, repair and replacement (both timber and steel)
- Corrosion preventive treatment
- Pile installation and removal
- Boat ramp flexmat installation
- Boat ramp design, demolition and fabrication and installation of pre-cast concrete panels

The quality of workmanship offered by Mandurah Jetty Construction has always been of a very high standard and I would have no problem in recommending them for any works of a similar nature.

Yours Sincerely,

Chris Abbiss  
Waterways Technical Officer – City of Mandurah
